Career Objectives

Driven Computer Science graduate with strong expertise in Java, SQL, and backend development, and hands on experience working on live product based projects, including web applications and ERP systems. Proficient in building scalable solutions, debugging production issues, and collaborating in team driven environments. Passionate about delivering high quality software, continuously learning new technologies, and contributing to organizational growth as a Software Developer.

Experience

- Trainee Software Developer | OMS Business Digitalisation Pvt Ltd** **September 2025 – January 2026**
 - Worked in a product based company on two live projects** a company website and an ERP system. **designed and developed the website from scratch** using **React JS, React Router, Astro, and Tailwind CSS**, delivering a high quality, production ready solution.
 - Developed backend modules and implemented critical features for the ERP product** using **Advanced Java, Servlets, Spring Boot, and MongoDB**, contributing to improved functionality and overall project progress.
 - Supported live production environments** by implementing new features, performing frontend and backend debugging, resolving **Git merge conflicts**, and assisting in application deployments.
- Java Full Stack Intern | Tequed Labs** **August 2023 – September 2023**
 - Front End Development:** Designed and optimized user friendly front end components using HTML, CSS, and React.js, boosting engagement and improving the overall user experience.
 - Backend Development Expertise:** Developed and optimized backend systems by improving database queries, implementing caching mechanisms, and designing a modular architecture to enhance performance and scalability.

Education

Angadi Institute of Technology and Management **2020 – 2024**
Bachelor of Computer Science and Engineering, CGPA: 8.1 *Belagavi, Karnataka*

Skills

- Programming Languages and Frameworks:** Java (Core, Advanced), Spring Boot, Hibernate, RESTful API.
- Web Technologies:** HTML, CSS, Tailwind CSS, JavaScript, ReactJS.
- Database:** MySQL, MongoDB.
- Developer Tools & Version Control:** VS Code, Spring Tool Suite (STS), Git, GitHub, GitLab, SourceTree, AI Tools

Projects

- JDBC-CRUD-System - Technologies Used: Java, JDBC, MySQL.**
 - Developed a desktop application to perform CRUD operations on employee data using JDBC and MySQL.
 - Implemented a user friendly GUI to view, add, update, and delete employee records. Included exception handling for duplicate entries and invalid/non-existent IDs.
- Data Structure Visualization in JFrame - Technologies Used: Java SE, JFrame, Java.**
 - Developed an interactive Java application to visualize operations on fundamental data structures in real time.
 - Implemented insertion, deletion, sorting, and searching operations, with proper exception handling (e.g., empty stack/array, element not found).
- Skin Disease Detection - Technologies Used: Python, Django, Machine Learning (BERT, LSTM, ViT), HTML, CSS**
 - Developed a machine learning model using image processing with algorithms like BERT, LSTM, and ViT.
 - Designed a web application using Django for backend and frontend, allowing users to upload images and receive accurate prescriptions. The application improves diagnostic speed by 20%.

Achievements

- Secured 1st place in a Coding Competition at Angadi Institute of Technology and Management.
- Successfully submitted an idea proposal to K-Tech, Karnataka Government initiative, which resulted in receiving funding.
